

WHAT'S SO GOOD ABOUT OUR ENRICHED BIOCHAR?

TRICHODERMA

Antagonistic fungi for root protection, seeks out and eliminates diseases and nematodes.

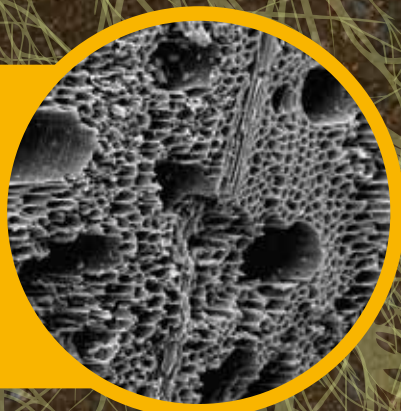

MYCORRHIZAL FUNGI

Secondary root system for healthier plants. Gives plants access to more nutrients in the soil or substrate.

BIOCHAR

Huge surface area for higher water and nutrient retention. Porous stable structure for microbiology to inhabit & multiply.

WORMCASTS

Full of bacterial species which increase phosphate availability. Stimulates root growth and rich in humic acids.

SEAWEED

Trace minerals for leaf and stem growth. Micronutrients essential to healthy root systems.
